

## Professional Learning and Networking Meeting

### Equity through MTSS: Engaging in Data Analysis for Continuous Improvement for All Students

This professional learning opportunity will provide peer-to-peer collaborative learning and networking for district and school staff. Participants will explore problem-solving, procedures for data analysis and action planning. In addition, participants will have the opportunity for a 'deeper dig' into the problem solving and data analysis processes through subgroup gap analysis at the district and school levels.

The morning will focus on collaborative learning facilitated by IL MTSS Network Capacity Coaches. Optional afternoon activities will include additional opportunities for supported application, data analysis, and action planning using local district and school data.

**Free Registration at:** <https://www.eventbrite.com/e/south-professional-learning-networking-meeting-registration-50451362383>

**Space will be limited, so register early!**
