

Chemical Inventories - Minimum requirements

School Chemical Inventories are required for each school. The Inventory may be hard copy or on a CD. All chemicals, including cleaning products, gasoline, detergents, hand sanitizers, etc. should be included. A copy of the school's chemical inventory must be presented at the beginning of the annual inspection. Minimum requirements are:

Name of the Chemical

Quantity at the beginning of the school year

Quantity at the end of the school year

Usage during the year

SDS for each type and brand of chemical (Main office file and at place of storage/use)

Science laboratory inventories are separate from the school's chemical inventory and must be presented at the same time. Minimum requirements are:

Name of the Chemical

Purchase date and quantities purchased

Quantity at the beginning of the school year

Quantity at the end of the school year

Usage during the year

SDS for each type and brand of chemical (Main office file and at place of storage/use)
